(54) Title: CABLE ORGANIZATION AND HARDWARE SHELVING SYSTEM

(57) Abstract: A mounting bracket is used in a system for supporting electrical components to a support structure. The mounting bracket includes a base with an elongate beam that having a planar web and at least one transverse flange and a hook structure that may be an elongate arm. The mounting bracket has various structures to secure wires, auxiliary suspension members, cable ties and the like. The system utilizes two brackets that together form a shelf to support electronic equipment. The brackets may mount on a slotwall-type upright support member or,
